SARAYROLL Hakkında...

Bugün dünyadaki toplam enerji tüketiminin % 39'u evlerimizin soğutulması ve ısıtılması için kullanılıyor. Konutlarda ısı yalıtımda sağlanan en ufak bir iyileştirme dahi, yalnız enerji tüketimimizi düşürerek dünyamızın geleceğine katkıda bulunmamızı değil, aynı zamanda tasarruf etmemizi de sağlar.

Yapılarda ısı transferini en aza indirgemek için dikkat edilmesi gereken temel unsurlardan biri de panjur seçimidir. Pencereler, hemen her zaman ısı kaybının en yoğun olduğu bölgelerdir. Çünkü fizik kanunlarına göre, ısı her zaman, yüksek sıcaklık bölgelerinden düşük sıcaklıktaki bölgelere doğru yönelir. Bu nedenle iç mekândaki sıcaklık, daha düşük derecedeki dış mekâna doğru pencerelerden hareket eder.

Saray'ın alüminyum profil üretimindeki geniş deneyimi, size panjurla ilgili tüm ihtiyaçlarınızı karşılayacak, yüksek kaliteli, inovatif ürünlerden oluşan kapsamlı bir katalog sunmamızı sağlıyor. Güneşten koruyan, ses ve ısı transferini azaltan, yüksek performansa sahip poliüretan dolgulu alüminyum lameller, ekstrüde edilmiş alüminyum lameller, çeşitli yardımcı aluminyum panjur profilleri ve kullanılan aksesuarlar geniş ürün yelpazemizi oluşturuyor.

Her biri, hem ısı ve ses yalıtımlı, hem de montaj kolaylığı sunacak şekilde tasarlanmış PVC monoblok kutular ve ekstrüde edilmiş alüminyum kutular ise bu geniş yelpazeyi tamamlıyor.

About SARAYROLL...

39% of the world's total energy consumption is used to cool and heat our houses. Any improvements made due to insulation allows us not only to contribute to the future of our world by reducing our energy consumption, but also to save money at the same time.

Choosing a good shutter is essential for buildings which will prevent and reduce the transmission of heat. The windows are the areas where heat loss is most intense. According to the laws of physics, heat always moves from areas of high temperature to those at a lower temperature therefore in the cold external temperatures, the warmth inside a building will try to escape through windows.

Saray's extensive experience in manufacturing aluminium profiles, PVC profiles, shutter profiles, enables us to offer an extensive catalogue that will meet your requirements about shutters. We offer a wide range; top performance polyurethane filled aluminium slats, extruded aluminium shutters, various types of aluminium auxiliary profiles and accessories , that protect from the sun, reduce sound and heat transfer.

Innovative high quality PVC Monoblock boxes and extruded aluminium boxes designed to provide both heat and sound insulation as well as ease of assembly, complete this wide range.
